

RF-CONTROL

RF Control
Latex-Turbidimetry

Quantitative determination of RF

IVD
Store at 2 – 8 °C

PRODUCT CHARACTERISTICS

The control is a liquid control of human origin containing RF used to evaluate the precision and the accuracy of RF determinations in human serum by turbidimetric method.

REAGENTS

RF CONTROL	Liquid control of Human origin with a low concentration of RF
------------	---

PRECAUTIONS

Components from human origin have been tested and found negative for the presence for HbsAg, HCV and antibody to HIV (1/2). However handle cautiously as potentially infectious.

PREPARATION

Ready to use

STORAGE AND STABILITY

This control is stable until the expiration date on the label when stored tightly closed at 2-8 °C and contamination is prevented during their use. Do not use reagents over the expiration date.

PROCEDURE

To be used in turidimetric assays.
